## OBJECTIVE

responsible for creating and maintaining web applications using the Django framework and Python. I have a keen interest in learning new technologies and continuously improving my skills. With a focus on web design and Web Development.

---

## EXPERIENCE

### XYZ Company

Project coordinate

This is a **Flask framework**-based project and uses the **SOL lite database**. This is a **Todo Application** and we are performing a **CRUD operation** in a specific project and don't use **any API**

### ABC Company

Backend Developer

This is a self-built project that uses a pure **Django framework** and uses a completely Django backend database and full **authentication** for the **signup** and **login system and logout**.

### RMP Company

Developer

This is a Django project and the name of this project is **TEXT Utils**. These perform various functions like letter **uppercase**, **Lowercase**, **punctuation** and **white space** maintenance. This is a **Django base** project.

### XYZ Company

Data Analytics

Used targeted **data analytics** to enhance network operations drive continuous **service improvements** and **create a meaningful full dashboard**.

## EDUCATION

### University of AKTU, Lucknow

2017 - 2021

Bachelor of Technology

83.45 %

### University of AKTU, Lucknow

MBA [ IT and OM]

---

## SKILLS

Django

Django Rest APIs

Python Programming

SQL Server Validation

Flask

Bootstrap

Problem-solving

Project Coordinator  
Front-end developer  
Data Analytics

---

## PROJECTS

### (1).. Landing page.

The **two primary** sections of the landing page are the header and the **hero sections**. The **header** area contains the **navigation menu**, while the hero section has some text and images and uses **animated graphics**

### (2).. Technical documentation page.

**Technical documentation** provides essential **information** about a product or **service** to a person or **organization** in need of it.

### (3).. Form- validation

This is a **server-side validation form** using a **back-end database** and stores the information of the user and applied **CRUD operation**
